

AT-930DG Automatic Flight Inspection System (AFIS) Delivered to Poland Air Defense Forces

February 2006

Airfield Technology, Inc. of Olathe, Kansas, USA has delivered a new AT-930DG Automatic Flight Inspection System (AFIS) to the Poland Air Defense Forces (PAADF).

The new system has been installed in a Mielic M-28 aircraft and is supporting the flight inspection and calibration of new ICAO-compatible navigational aids being installed in Poland.

The contract for the AFIS was awarded to Airfield Technology by the United States Air Force through the Foreign Military Sales (FMS) group of the Electronic Systems Center Global Air Traffic Operations Mobility Command (ESC/GAF) at Hanscom Air Force Base.

The Air Force selected the Airfield Technology system from numerous competitive offers, ultimately choosing the superior product and service provided by the AT-930DG AFIS.
