

Olathe, Kansas – June 09, 2006. Airfield Technology Inc. proudly announces our certification as an ISO 9001:2000 compliant company.

This achievement represents our position as an industry leader, and our continued commitment to high-quality products and services.

“ISO registration supports our pursuit of continuous improvement and an on-going commitment to provide our customers with the best possible product”, said Larry Brady, Managing Director of Airfield Technology. “Our success in achieving this goal is due to the tremendous dedication and teamwork of our employees”.

The reliability of our products in actual field use has been phenomenal. Our commitment to ISO certification further demonstrates our resolve for the future.

ISO standards specify the requirements for state-of-the-art products, services, processes, materials and systems, and for good conformity assessment, managerial and organizational practice.

In business for more than 15 years, Airfield Technology specializes in the design, manufacturing, and installation of Fully Automatic Flight Inspection Systems. We also provide a full range of technical and engineering support services for aircraft radio navigation aids.
